

CCMC 10 (13175-R)

Liquid Rubber

Industries International
Protective Coatings Division

(#13175-R)

Liquid Rubber is certified by the Canadian Construction Materials Centre for use as a Water-Proof membrane.

CCMC certification is recognized also in the foreign markets listed below.

CCMC Liaison Agreements

These agreements have been developed in response to the need to reduce technical barriers (different technical requirements for the evaluation of building products in the context of building code requirements) in key foreign markets, which restrict the acceptance of and Canadian trade in building products and services. CCMC has formal Liaison Agreements with the following organizations:

- [Agrément South Africa](#)
- [British Board of Agrément](#)
- [Civil Engineering Research Foundation \(United States\)](#)
- [ICC Evaluation Service, Inc. \(United States\)](#)
- [National Building Research Institute \(Israel\)](#)
- [The Building Centre of Japan](#)
- [The Centre for Better Living \(Japan\)](#)
- [Building Research Association of New Zealand \(BRANZ\)](#)

Other CCMC accomplishments related to this initiative include:

1. A [joint declaration on Certification and Technical Approval](#) signed by Canada and Russia. The declaration paves the way for CCMC and Canadian certification and testing organizations to be recognized under the Russian product assessment system;
2. A letter of Agreement on Cooperation between CCMC and the Federal Center of Certification in Construction of Russia's Gostroy to facilitate the technical assessment of exports from and in both countries.

CCMC will continue to work with its counterparts in Russia to facilitate market access for Canadian products in the Russian marketplace
